CAREER OBJECTIVE

Computer Science student with practical experience developing web applications and RESTful APIs using ASP.NET Core, Django, and Laravel. Demonstrated focus on backend development, relational database design, and server-side application logic. Currently advancing full-stack competencies through the DEPI Full Stack .NET Developer program. Seeking an Internship to engineer solutions that drive measurable outcomes within a collaborative development environment.

EDUCATION

Cairo University - Faculty of Computers and Artificial Intelligence, Bachelor of Computer Science 2023 – Present

- Coursework: Data Structures & Algorithms, OOP, Database Systems, Operating Systems, Software Engineering, System Analysis & Design, Computer Networks

TRAINING

Digital Egypt Pioneers Initiative (DEPI), Full Stack .NET Web Developer Trainee Dec 2025 – Present

- Developing web applications using C#, ASP.NET Core MVC, and Web API, with focus on RESTful API design and backend service architecture
- Working with SQL Server for database design, CRUD operations, and relational data management
- Applying software engineering principles including dependency injection, separation of concerns, and clean code practices in full-stack development workflows

PROJECTS

CineTrack - Movie Tracker Web App | Laravel, PHP, SQLite May 2026

- Developed a Laravel-based movie tracking application with features for movie search, watchlists, and viewing history
- Built backend functionality using Laravel MVC architecture, database migrations, SQLite, authentication, validation, and secure file uploads
- Integrated the OMDb API for movie data retrieval and wrote PHPUnit tests to validate backend functionality

HireSphere - Job Search Platform | Django, Python, SQLite Apr 2025

- Built a Django-based job platform with role-based authentication for recruiters and job seekers, supporting job postings, applications, and profile management
- Designed and managed relational database models using SQLite and Django ORM while implementing filtering, authorization, and search functionality
- Applied MVT architecture, server-side validation, session-based authentication, and file upload handling following backend development best practices

TECHNICAL SKILLS

- **Languages:** C#, Python, Java, PHP, JavaScript (Basic)
- **Backend:** ASP.NET Core, Laravel, Django, RESTful APIs, MVC Architecture, Entity Framework Core, Dependency Injection
- **Frontend:** HTML, CSS, JavaScript
- **Database:** SQL Server, SQLite, Relational Database Design
- **Core Concepts:** Data Structures & Algorithms, OOP, SOLID Principles, Design Patterns, Software Engineering Principles
